

Borg Displays OEM Program

Extend your brand at the expense of ours!

Borg offers a very aggressive OEM opportunity for you to easily customize the look and feel of your deployments. Whether your needs are a full custom bezel like brushed stainless or simply adding your logo and custom colors to the elegant acrylic bezels or even changing the button icons (and icon color, background) to better suit your software needs. Remember we can provide the button GPIO so you can insert one-touch access to key points in your software.

Two easy ways to brand Protégé touchscreens for your clients.

- 1) Order just 20 Pro8-Pro15a units and we pay setup and inventory of 50 bezels.
- 2) Pay \$450 setup + \$20/bezel for 50 bezels and then just order 1 unit at a time.

All acrylic bezels are back-painted via a silk-screening process for:

1. Bezel color – standard is white
2. Logo and color – complex logos might require additional fees
3. Button icons
4. Button icon color
5. Button background

It's that simple. So take advantage of our rapid customization capabilities and get exactly what you want. **Call today for volume pricing.** You will be impressed!

The look & feel exactly like you want it – color, logo, icons!
Custom firmware – including splash-screen logo, settings, etc!
Set hooks from bezel buttons to key applications - customize the icons!
